Professional Summary

Computer Science graduate and Software Engineer with experience building web applications using PHP/Laravel, Node.js/Express, and Java/Spring Boot, C#/.Net. Strong backend foundation in RESTful development, database design, authentication, and version control, with additional front-end knowledge in HTML, CSS, JavaScript, and Bootstrap. Detail-oriented team player focused on scalable code, clean architecture, and practical software delivery.

Education

B.Sc. in Software Engineering

[Graduated: Jul.2026]

Cairo University – Faculty of Computers and Artificial Intelligence

Technical Skills

- Back-End: Java, Spring Boot, PHP, Laravel, Node.js, Express, C#, .Net MVC
- Databases: MySQL, PostgreSQL, MongoDB
- Front-End: HTML, CSS, JavaScript, Bootstrap
- Tools: Git, GitHub
- Testing: Robot Framework, Selenium, JUnit

Experience

DEPI, Full Stack PHP Web Developer, Cairo, Internship

[Aug.2026]

- Completed a six-month internship at DEPI (Digital Egypt Builders Initiative) as full stack web developer using C# and .Net MVC.
- Built web APIs, business logic, and MVC applications using C# and .NET Core, while working with Microsoft SQL Server for relational database design and query writing.

NTI, Full stack .Net Web Developer, Online, Internship

[Sep.2025]

- Completed an online one-month internship at NTI (National Communication Institute) as full stack web developer using PHP and Laravel.
- Covered HTML5, CSS3, responsive design, JavaScript, database management, authentication, authorization, session management, cookies, file handling, PHP security best practices, Laravel, and MySQL.

Nasr Petroleum Company, Suez, Internship

[Jul.2023]

- Completed a one-month internship and gained exposure to multiple technology environments.
- Strengthened productivity and reporting skills using Microsoft Word and Excel.

Projects

Siyah - C#/.Net with AI Integration

[[Github](#)]

- Worked on an AI-powered tourism platform that gamifies the travel experience.
- Implemented features such as AI monument recognition, smart navigation, interactive challenges, and a global leaderboard.

SafeWay - NodeJS/Express & Flutter

[[Github](#)]

- Built a community incident reporting app, where users report incidents whether they are online or offline.
- Implemented the offline report transmission using Flutter's Nearby Connections package using Bluetooth.
- Created systems in the back-end that help the user acknowledge reports and get rewarded or penalized by actions taken using the reputation system.

Academix - PHP/Laravel

[[Github](#)]

- Built a role-based web application with authentication and course management.
- Developed student dashboards for course browsing, enrollment, and tracking.
- Implemented instructor features for course CRUD and enrollment management.

Weather Forecast - NodeJS/Express

[[Github](#), [Website](#)]

- Built a location-based weather forecast web application.
- Converted user-entered locations into coordinates and retrieved forecast data via external APIs.
- Presented forecast results through a clean, user-friendly interface.

Travel-Agency - Java/Springboot

[[Github](#)]

- Built a travel booking platform for worldwide event reservations.
- Added hotel recommendation logic based on nearby locations.
- Created a booking dashboard for managing reservations and recommendations.

Courses

AI Career Essentials

[Sep.2024]

- A two-month introductory course on practical AI concepts and professional use cases.

Business Model Innovation

[Dec.2023]

- Participated in a three-month entrepreneurship course focused on teamwork and building a mobile application for educational challenges.

Languages

- English: Full Professional Proficiency
- Arabic: Native Language
